 **First Glass**
Glass packaging delivery
– highest quality service

Glass packaging delivery – new definition

Highest quality delivery service of your products
in glass packaging

FirstGlass is completely new delivery system of glass packaging.

Advantages of the system:

- Most importantly – your products will reach its destination without any harm.
FirstGlass delivery system have been thoroughly tested by German patent institute. The system is Deutsche Post – DHL 606/2017 certificated.
We guarantee that your glass packaging will reach destination without damage.
- Working with FirstGlass is fast and easy. It saves your time and money.
- FirstGlass system saves storage space.
- FirstGlass system protects natural environment.
- FirstGlass system is more cost-effective comparing to standard delivery systems (Hulsensysteme – sleeve systems).

On next pages we will present FirstGlass advantages.

 **First Glass**
Glass packaging delivery
– highest quality service

Task: 800 km of delivery route

Lots of things can happen during long route...

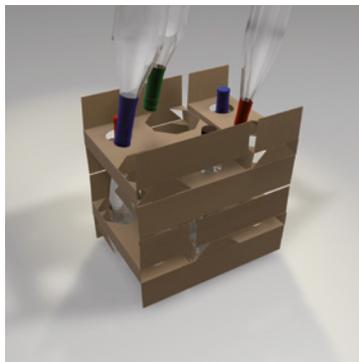

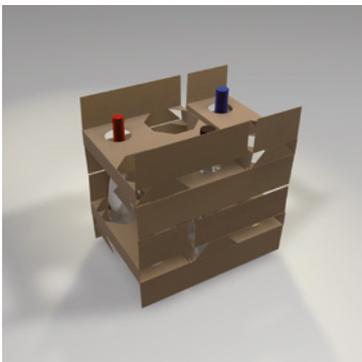

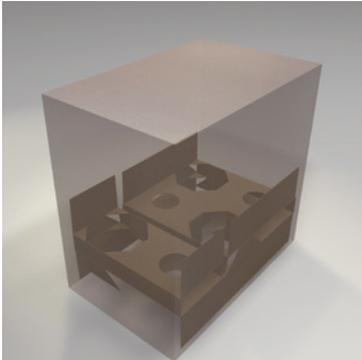

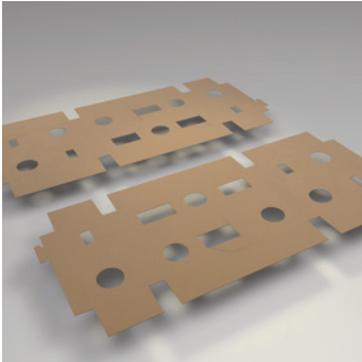

... that's why complex security of Your product has a meaning.

Glass packaging is especially fragile during cargo delivery. Always in a hurry, always faster. Often packages including glass gets damaged, which means that it is wise to make sure Your goods are packed in proper way – this especially concerns glass packaging.

Financial loss in that kind of deliveries might be significant, this is why FirstGlass have been thoroughly tested, as well as certified by Deutsche Post, and DHL Germany. The test contains 8 drops (made in special conditions) on edges and every side of the box. Each of proposed by us boxes has been tested this way.

Security is not the only one of FirstGlass advantages.

The pictures shows assembly without outer carton. On picture 4 you can find visualization of outer carton.

Time is money...

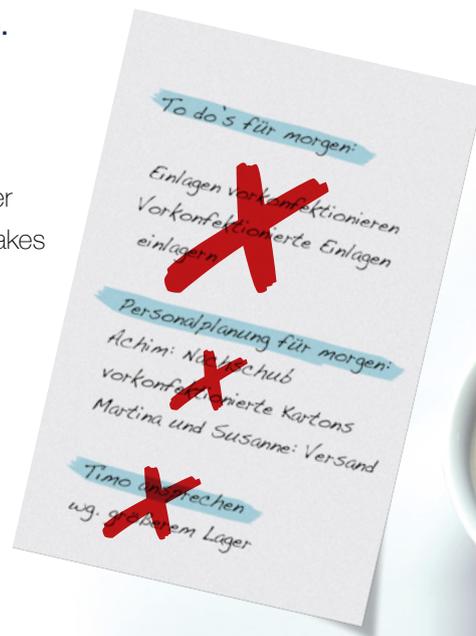

Fast and easy to handle

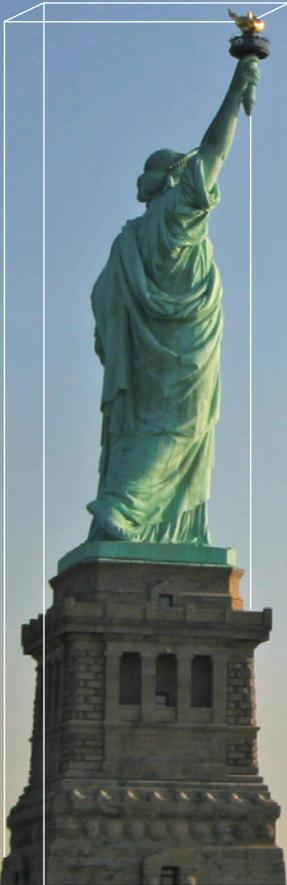

Aim of FirstGlass system development was to make glass items delivery system as easy as possible. It took more than two years to reach outcome – packaging system which guarantees safety during transport, at the same time is easy to handle and time-saving.

Remember – Time of your Workers is precious. Count how much time you need to prepare packages in other system.

Each glass packaging (e.g. bottle) is attached and protected by 4 items inside outer carton.

Inserts are easy to handle, helps to prepare delivery package fast and without effort. Outer carton needs only 2 inserts, thanks to that, time needed to assembly is 40% shorter comparing to similar packaging systems. It takes only eight moves to prepare two inserts.

You can pack and save
at the same time:

Using FirstGlass system to pack 7000 pcs
of 12 wine bottle packages, you save
enough packaging material to make a box
containing... Statue of Liberty – think
how much of storage space you are
saving, and what impact it has on natural
environment.

Storage space saving, less transport cost, and at the same time natural environment protection!

Less means more...

FirstGlass system means saving by less storage space comparing to standard transport sleeves. In order to send 12 bottles you need only 3 elements, in standard system you need at least 5 elements.

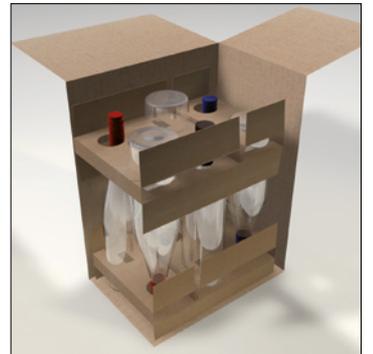

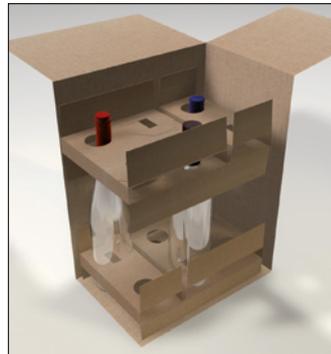

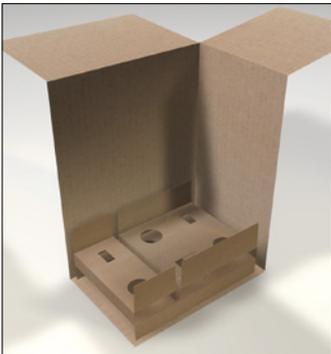

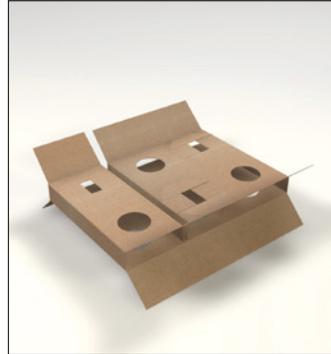

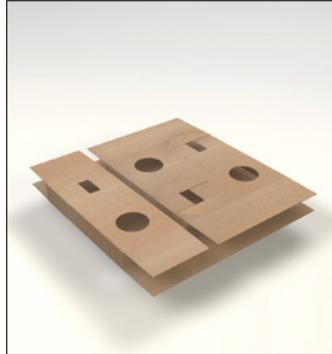

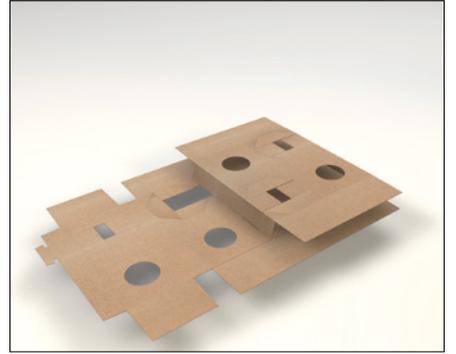

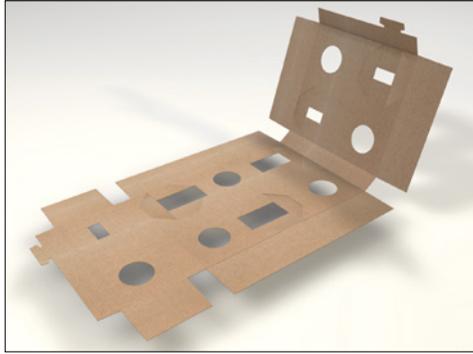

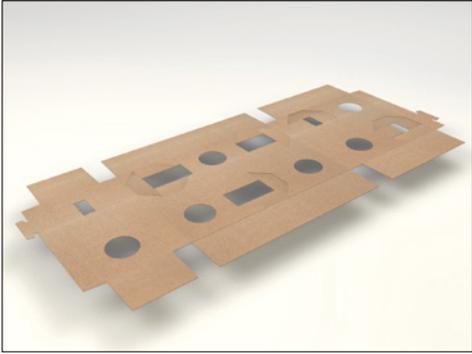

Advantages:

- Transport cost saving – more inserts fit pallet size.
- Less storage space – lower costs
- Simplified logistics – FirstGlass system inserts are not pre-fabricated, you assemble them while preparing the delivery process.

Protecting natural environment!

To produce FirstGlass system we use 40% less material, thanks to that more trees remain untouched in forests. During production process waste is very limited, changing of packaging system into FirstGlass means that less trucks drive through our roads – simply the same amount of goods is packed on less pallets.
